

Technical Info for Bands

Thank you for agreeing to play our gig. We are delighted that you have accepted. We want the night to be as organized as possible, so we all have a smooth show. Bands will play 30mins-45mins unless headlining then you shall have 1hr-1.5hr unless stated otherwise.

Weekend Offender will NOT be providing house backline, due to transport, if bands are happy to let other bands use their backline that is fine with us but please note Weekend Offender take no responsibility for it.

Please can a band member email or WhatsApp over technical specs to Callum at least 3 days before the show email is callum@cottlesounds.com. Please can this include instruments, number of vocalists and roughly how many channels needed, any other information is greatly appreciated too, like placement of band members or if you bring your own sound engineer. Any other general questions about the gig please feel free to email Matt at matt@weekendoffenderrecords.com

Attached to this document will be a channel list that will be on our audio console, so if you bring your own sound engineers, they can see what we are using. The audio console will be an Allen & Heath SQ5 with an Allen & Heath GX4816. We have full recording capabilities so if bands want their sets recorded please let Callum or Matt know before the gig so they can organize this.
